WORK HISTORY (refer to <http://www.dorisasmith.com/> for URLs and screenshots)

1998 – present **Web Development, dorisasmith.com**

Offered independent web development, focused primarily on front-end development. Created WordPress based sites as well as static sites. Advised on accessibility issues and search engine optimization.

2007 - 2008 **English Teacher, Caledonian School, Prague, CR**

Taught English as a second language to students at all levels from intermediate to advanced. Prepared lesson plans. Taught Business English, including English for Information Technology.

2002 - 2006 **Technical Producer, Powel-Minimax, Inc., St. Paul, MN**

Produced and maintained websites for Alameda P&T and Alameda TV; developed style guides for sites; ensured compliance with accessibility guidelines. Created database and application for online cable TV and Internet service ordering, customer feedback, customer reviews of TV shows and movies, and an Intranet site.

Installed Oracle and NetBas (Powel proprietary software) on server and client workstations; trained users; and provided technical support.

2001 **Web Producer, UtilityOne, LLC, Emeryville, CA**

Coordinated efforts of designers, content providers, developers, programmers, database administrators, and quality assurance engineers. Ensured compliance with documented requirements and processes. Responsible for look and feel of web-based software. Developed demonstration CD for sales staff. Maintained websites for UtilityOne, parent company (FirstPoint Energy Corporation), and Intranet site; developed style guides for sites.

1999 - 2001 **Technical Producer, Utility.com, Emeryville**

Managed production for site through two significant site redesigns, the introduction of four new services, the expansion of services into new service territories, and a restructuring of the underlying data model. Coordinated efforts of designers, content providers, developers, and quality assurance engineers. Documented requirements and processes; developed site style guide. Developed prototype sites (including sites in Italian and French) for company's innovative e-Utilities program and for telecom partners. Conducted onsite training in HTML and JavaScript.

Doris A. Smith

1997 - 1999 Web Programmer, California Gas Transmission, Pacific Gas & Electric Company, San Francisco

Developed Pipe Ranger website. Created web-based interfaces to allow non-technical staff to update time-sensitive information. Wrote scripts to deliver dynamic content. Conducted onsite training in HTML. (Informally) assembled web production team; served as team lead. Provided ongoing site maintenance. Analyzed site traffic. Administered listserv-based mailing lists.
